

WHAT WE OFFER

- ➔ **Managed Security Service Provider**
24/7 threat detection, incident response, and firewall management to protect your systems from evolving cyber threats without the cost of building an in-house security team.
- ➔ **Managed Service Provider**
24/7 monitoring, help desk support, and proactive maintenance keep your IT systems running smoothly and securely.
- ➔ **Chief Information Officer**
CIO-level strategy to align technology with business goals, optimize IT budgets, and drive growth.
- ➔ **Cloud Infrastructure & Management**
CIO-level strategy to align technology with business goals, optimize IT budgets, and drive growth, as well as guidance on infrastructure, compliance, and vendor management to support long-term success.
- ➔ **Data Security & Recovery**
We design, manage, and optimize secure, scalable cloud environments to help businesses stay agile and cost-efficient. Our certified experts handle everything from resource provisioning to disaster recovery and cost control.
- ➔ **IT Support & Help Desk Outsourcing**
Fast, expert support for desktops, servers, firewalls, security, antivirus, and Mac systems. With phone, email, and chat access, businesses get reliable, efficient help whenever it's needed.
- ➔ **Infrastructure Security Services**
In-depth security audits, disaster recovery planning, and cloud configuration reviews to ensure your infrastructure is protected and compliant.
- ➔ **Cloud Computing**
We customize secure, compliant solutions across platforms like Microsoft, AWS, Google Cloud, and Citrix to match your business needs.
- ➔ **Life Sciences**
From validated software and secure cloud migrations to 24/7 monitoring and risk assessments, we help Life Sciences companies build, manage, and protect their technology infrastructure with confidence.
- ➔ **Non-Profits**
We help non-profits access reliable IT and cybersecurity services tailored to tight budgets and regulatory needs. Our subscription-based model offers predictable costs, expert support, and access to discounted tools like Blackbaud, Daxko, and Sage—delivering enterprise-grade solutions for less than the cost of a full-time IT hire.

CASE STUDY

FULL REMOTE TRANSITION WITH AUGUST ETECH

OVERVIEW

A client sought to transition their entire business to a fully remote model, including migrating all applications and infrastructure to the cloud. August eTech developed a comprehensive plan comparing Microsoft Azure, Google Cloud Platform, and AWS, ultimately guiding the client in selecting and implementing Microsoft Azure.

SOLUTION

August eTech recommended Microsoft Azure based on cost, security, and scalability. They deployed:

- 50 virtual desktops via Azure Virtual Desktop for remote access
- 30 virtual servers for application hosting
- Azure storage for secure, compliant data handling

RESULT

With Azure's flexible cloud infrastructure, the client enabled secure remote access for employees, improved scalability, strengthened data protection, and optimized IT costs through pay-as-you-go pricing. August eTech's strategic guidance ensured a smooth migration, positioning the company to thrive as a fully remote operation.

ABOUT US

August eTech is a leading Managed Service Provider (MSP) and Managed Security Service Provider (MSSP) offering affordable, comprehensive IT solutions since 2001. Acting as a full-service IT department, we provide expert support—from desktop technicians to cybersecurity specialists—for the cost of a single full-time employee. With over 20 years of experience, we deliver proactive, personalized service and strategic IT guidance to keep businesses running smoothly and securely. Headquartered in New Jersey, we proudly serve clients across the U.S., Asia, and Europe.

”

Thanks for all your splendid work August eTech. We are so glad that we switched to you. I wonder where we'd be without you. . .”

Pharmaceuticals Industry,
Lawrence H, CEO
